3-Port Multi System	3MXS24JVJU	Non-Ducted Indoor Unit	16.6	12.5	9.0

On February 17, 2009, President Obama signed The American Recovery and Reinvestment Act of 2009, a stimulus bill that significantly enhanced energy efficiency tax credits available for homeowners in the tax years, 2009 and 2010.

Homeowners can claim 30% of the costs (up to a \$1,500 limit) for the installation of higher efficiency equipment, including air source heat pumps. The tax credit applies to the installed costs of the qualified equipment, which includes labor. Homeowners may only claim \$1,500 in total for any energy efficient improvements and can choose to use the entire credit toward the installation of one appliance.

Tax credits reduce the amount of income tax homeowners owe. Unlike a deduction, which reduces the amount of income subject to tax, a tax credit directly reduces the tax itself.

When claiming the tax credit, homeowners should review the final rules and forms developed by The Internal Revenue Service (IRS) to clarify which products and services qualify for the tax credits. For more information on obtaining the tax credit, click [here](#), or visit the Air-Conditioning, Heating, and Refrigeration Institute (AHRI) at AHRINET.org and click on the 2009 Energy Efficient Tax Credits.
